Winter 2026 | Summer 2026

6	18	6	2
Days	Talks	Workshops	Open stages

The Winter 2026 agenda in the layout of the Summer 2026 agenda on bitshala.org/boss: colour, type, components, the full desktop agenda and the 390px mobile agenda. Programme from the BOSS PM Sheet, “BOSS Schedule” tab.

Colour

One dark theme taken from bitshala.org/boss. The card fill is the only signal of session type.
Every outline is a flat 2px steel blue, with no glow, gradient or shadow.

Components

Six pieces build every day of the agenda. They size themselves by their container, so the same markup works on desktop and phone.

Day header

Full width. **plum-900** fill, flat 2px **frame** outline, 12px radius. Inter Bold 24px on the left, Medium 21px hours on the right. A day with no sessions is just this bar.

OCTOBER 27 • DAY 02 : AI, Developer Tooling & Bitcoin Core 10:00 AM - 5:00 PM

Session cards

8px radius, 2px border. Colour is the only type signal: **Workshop** olive with a yellow border, **Talk** slate, **Open Stage** plum. White time chip (12-hour, no AM/PM), bold title, the text after a colon on a smaller line, italic byline, duration bottom right. Open Stage has no “by” line.

Opened card

A card with an abstract shows a small **+** next to its duration. Tapping the card opens a 1–3 sentence abstract, and the + turns into −.

10:30 **Post-Quantum Signatures in Practice:**
Hash, Lattice, and Isogeny Schemes
*by **Jamal***
− 60m

A 10-minute overview of hash-based, lattice and isogeny-based signature schemes. Participants then sign the same message with one algorithm from each family by completing prepared starter code, and finish by benchmarking the three on signature size, public-key size and verification time (benchmark code provided).

Session block & lunch strip

Block: 2px **frame** outline, 16px radius, “Session 03” and its range in Medium 21px, cards 12px apart. Numbering runs across the summit. Lunch: an 88px column with a vertical chip, LUNCH and 90m. At 860px and below it lies flat between the blocks.
